PORCELANOSA BATHROOMS

## *MorethanWater*

Noken Porcelanosa Bathrooms is Porcelanosa Group's bathroom equipment specialist. Ever since it was set up, the firm has been defined by offering the highest level of technology, quality and exclusivity in its bathroom elements, from toilets and baths to highly innovative taps, washbasins and bathroom furnishings, shower trays, towel rails and bathroom accessories.

Noken Porcelanosa Bathrooms est la société du groupe Porcelanosa qui se spécialise dans l'équipement de la salle de bains. Depuis sa création, la marque s'est distinguée par les éléments hautement technologiques, qualitatifs et exclusifs, allant des WC et des baignoires aux dernières nouveautés en matière de robinetterie, de lavabos, de meubles de salle de bains, de pommeaux et de receveurs de douche, de sèche-serviettes et d'accessoires de salle de bains.

PORCELANOSA BATHROOMS

## PORCELANOSA

### GROUP SYNERGIES · SYNERGIES DU GROUPE

Noken shares knowhow with Porcelanosa Group. Therefore experts, criteria, and objectives are planned as a single brand with a comprehensive bathroom concept.

Noken partage son savoir-faire avec le Groupe Porcelanosa. Dans ce but, les experts, les critères et les objectifs sont organisés sous une seule marque, avec un concept de salle de bains globale.

### PRESENT IN 120 COUNTRIES · PRÉSENT DANS 120 PAYS

Noken is in a leading position of the sector's business rankings, exporting its products to more than 120 countries

Noken a fait sa place parmi les grands du secteur, et exporte désormais ses produits vers plus de 120 pays.

### 1,000 SALES POINTS · 1 000 POINTS DE VENTE

100 own stores and 43 logistics centres worldwide to support our advocates and customers

100 boutiques propres et 43 centres logistiques dans le monde entier pour accompagner nos prescripteurs et nos clients

5000

### 5000 PROFESSIONALS · 5 000 PROFESSIONNELS

Noken has its own team within Porcelanosa Group, with specialist professionals and support from the Group's entire network, creating synergies all around the world

Noken dispose d'une équipe propre au sein du groupe Porcelanosa. Elle compte des professionnels spécialisés, bénéficie de l'appui de tout le réseau de collaborateurs du groupe, et crée par ce biais des synergies dans le monde entier.

ME by MELIÁ, Dubai, Emiratos Árabes.

## AROUND THE WORLD

### PROJECTS AROUND THE WORLD PROJETS DANS LE MONDE ENTIER

Noken has successfully completed more than 1000 projects in various market segments.

Noken a mené à bien plus de 1000 projets dans de nombreux segments de marché.

### AFTER-SALES SERVICE SERVICE APRÈS-VENTE

After-sales follow-up and customer service is as fundamentally important as the other strategies we implement. That's why SAT (technical assistance service) is available in the 120 countries we work with.

Le suivi et le service que nous garantissons au client après la vente sont tout aussi essentiels que les autres stratégies que nous mettons en œuvre. C'est pourquoi nous disposons d'un SAV dans les 120 pays avec lesquels nous travaillons.

### QUALITY OF PRODUCTION QUALITÉ DANS LA PRODUCTION

High-traffic or continuous use bathrooms demand durable and highly resistant equipment. Which is why it's essential to incorporate designs that make cleaning and maintenance easy, adding value to your project

Les salles de bains qui subissent un transit important ou une utilisation continue nécessitent des équipements durables et très résistants. Des modèles faciles à entretenir et à nettoyer offrent donc une valeur ajoutée déterminante à chaque projet.

### OPTIONS FOR SMALL BATHROOMS OPTIONS POUR DES SALLES DE BAIN DE PETITES TAILLES

Compact bathrooms for small yet well-designed spaces nurture comfort, welcoming and relaxation. They may only be a few square metres big, but a small bathroom can be full of style, practicality and above all, efficiency

Les salles de bains compactes mais bien pensées destinées aux petits espaces sont synonymes de confort, d'accueil et de détente. Parce qu'une petite salle de bains, même si elle ne compte que quelques mètres carrés, peut avoir du style, être pratique, mais surtout être efficace.

## DESIGN & ARCHITECTURE

### FLEXIBLE DESIGN DESIGN FLEXIBLE

Noken constantly researches new advances in the creation and development of new technologies, updating and adapting to the needs of our advocates' projects

Noken étudie de nouveaux développements pour la création et la mise en œuvre de nouvelles technologies, en s'adaptant constamment aux projets de nos prescripteurs.

### R&D&I R&D+I

The R&D+i Department works with leading architects and highly complex designs, creating bathroom concepts that are ahead of their time.

Le Département de recherche, développement et innovation travaille avec des architectes de premier plan sur des projets très complexes pour créer des concepts de salle de bains en avance sur leur temps.

### DESIGN FOR THE EXPERIENCE DESIGN POUR L'EXPÉRIENCE

In recent years, bathrooms have moved away from being essentially practical spaces, becoming prime locations for our emotional wellbeing. New bathroom equipment solutions are inviting us to discover a new, revitalised space, designed for us to take care of ourselves and make the most of the time we spend there

Ces dernières années, la salle de bains a cessé d'être espace essentiellement pratique pour devenir une pièce essentielle à notre bien-être émotionnel. De nouvelles solutions d'équipement nous invitent à redécouvrir un espace remis au goût du jour, conçu pour nous prendre soin de soi et pour mieux mettre à profit le temps que nous y passons.

### NOKEN PRODUCTION CYCLE CYCLE DE PRODUCTION NOKEN

Noken cares for the product, from the raw material to the end of its service life, through the development, production, or customer satisfaction among other things..

Noken soigne l'ensemble des processus qui vont de la matière première à la fin de la durée de vie du produit, en passant par le développement, la production ou la satisfaction du client, entre autres.

BREEAM<sup>®</sup>

# The change you choose

It's time to relearn, stop, and take notice. Changing our habits - however small - can revolutionise our lifestyle and change the way we interact with the planet:

**#TheChangesYouChoose.**

Our eco-conscious concept WaterForest came about from us thinking about these changes. The label is shown on all products and solutions that reduce water consumption, CO2 emissions, and environmental impact. The label facilitates LEED and BREEAM certification for sustainable buildings, achieving water savings of up to 89% in hotel, housing and restaurant developments.

*Il est l'heure de désapprendre, d'arrêter et de prendre conscience des changements nécessaires. De modifier certains petits gestes qui peuvent (r) évoluer notre style de vie ainsi que notre manière d'interagir avec la planète : #TheChangesYouChoose.*

*La prise de conscience de l'importance d'un changement a donné naissance à WaterForest, notre concept éco-conscient. Les produits et les solutions portant ce label réduisent la consommation d'eau, les émissions de CO2 et l'impact environnemental, et favorisent l'obtention de certifications comme LEED et BREEAM pour les bâtiments durables. Ils permettent en outre d'économiser jusqu'à 89 % d'eau dans les projets d'habitation, de restaurants ou d'hôtels.*

	 NOKEN ECO-FLOW	 NOKEN ECO-FLOW	 NOKEN ECO-FLUSH
STANDARD	20l/min x 5 min: 100l	12l/min x 0,5 min: 6l	9l/f x 1flush: 9l
NOKEN	7l/min x 5 min: 35l - 65%	5l/min x 0,5 min: 2,5l - 60%	4,5/3l/f x 1flush: 3,5l - 61%

## **BRASSWARE** **ROBINETTERIE**

### **eco FLOW** **Noken Eco-Flow**

#### AERATORS

With no impact on user comfort, they maintain a steady flow rate regardless of pressure changes, limiting it by up to 89%. Replacements are available based on the desired volume (1.3 l/min, 3.5 l/min, 5 l/min, 7 l/min...)

#### AÉRATEURS

Ils maintiennent un débit stable en cas de changement de pression et le réduisent jusqu'à 89 %, sans nuire au confort de l'utilisateur. Ils se posent en fonction du volume souhaité (1,3 L/min, 3,5 L/min, 5 L/min, 7 L/min...)

### **Noken Eco-Start**

The cold-start mechanism opens the mixer tap in a central position, allowing only cold water to run. This therefore avoids any unnecessary use of hot water. It also leads to a reduction in energy consumption for heaters and boilers

L'ouverture à froid permet d'actionner le robinet avec le mitigeur en position centrale en ne laissant passer que l'eau froide. On évite ainsi de consommer de l'eau chaude inutilement. Ce système permet également de réduire la consommation énergétique associée au fonctionnement des chauffe-eaux et des chaudières.

### **eco FLOW** **Noken Eco-Flow**

#### LIMITERS

These maintain a steady flow rate regardless of pressure changes, limiting it by up to 70%. They can be installed on flexible or rigid pipes.

#### LIMITEURS

Ils maintiennent un débit stable en cas de changement de pression et le réduisent jusqu'à 70 %. Ils peuvent être installés sur les tuyaux ou les flexibles.

### **eco AIR** **Noken Eco-Air**

Natural rainfall was the inspiration behind the development of our innovative Noken Eco-Air technology. Air is drawn in to the shower head and mixed with water at a ratio of 3:1, then swirled around. It reduces water consumption by 10% and offers an improved waterfall effect.

Le développement de la technologie innovante Noken Eco-Air s'inspire de la pluie. L'air est aspiré par le pommeau de la douche et se mélange à l'eau dans un rapport de 3 pour 1, puis crée un tourbillon. Cela permet de réduire la consommation d'eau de 10 % et d'améliorer la qualité du jet.

### **eco STOP** **Noken Eco-Stop**

Noken has several different thermostatic faucets with ECO buttons. This mechanism enables savings of up to 50% of consumption. When the user reaches half of the flow handle's distance, it stops until the user presses the ECO button to access the thermostatic faucet's total available flow.

Noken propose plusieurs robinetteries thermostatiques avec bouton ECO. Ce mécanisme permet de réaliser une économie allant jusqu'à 50%. Lorsque l'utilisateur actionne le levier de débit jusqu'à la moitié de sa course, ce dernier s'immobilise jusqu'à ce que l'utilisateur actionne le bouton ECO permettant d'accéder à la totalité du débit du robinet thermostatique.

## SANITARYWARE SANITAIRE

### Noken Eco-Flush

4,5/3L. 6/3L.

Noken has incorporated several ECO flush mechanisms which save up to 61% water - the double flush uses 3 litres, and the total flush volume is 4.5 litres, compared with the conventional 9 litres.

Noken intègre différents mécanismes de chasse d'eau ECO, qui permettent d'économiser jusqu'à 61 % d'eau. En effet, la double chasse consiste en une chasse réduite de 3 litres sur un volume total de 4,5 litres au lieu des 9 litres conventionnels.

## SHOWER TRAYS RECEVEURS DE DOUCHE

### Noken Eco-Light

Our Light Stone shower trays have a compact flax fibre core.

By replacing wood with surplus flax fibre, we're constructing eco-friendly panels that help protect the environment and create a more sustainable future, combating deforestation.

The Light Stone series is characterised by being as light as it is resistant, and is easy to transport and install.

Le cœur de nos receveurs de douche Light Stone se compose d'une âme en fibre de tige de lin compacte.

En remplaçant le bois par les surplus de la production de fibres de lin, nous avons développé des panneaux écologiques qui protègent l'environnement, et contribuent à un futur plus durable en luttant contre la déforestation.

Facile à transporter et à poser, la série Light Stone se distingue par sa légèreté et sa résistance.

45% recycled flax fibre

45 % de fibres de lin recyclées

### Noken Eco-Stone

Mineral Stone represents our commitment to the environment without sacrificing the properties of high quality components: resistance, purity and lightness.

The formula we use for our Mineral Stone shower trays is composed of natural calcium carbonate residues from white marble quarries, and recycled products.

We reuse renewable bio-derivative products, with the aim of reducing marine pollution.

La ligne Mineral Stone est le reflet de notre engagement pour l'environnement, sans renoncer aux propriétés qui garantissent des éléments d'une qualité maximale : résistance, pureté et légèreté.

La masse que nous utilisons dans nos receveurs de douche Mineral Stone est composée de carbonate de calcium naturel, issu du surplus des carrières de marbre blanc, et de produits recyclés.

Nous réutilisons des produits bio-dérivés renouvelables pour réduire la pollution des océans.

60% recycled white marble · 60 % de marbre blanc recyclé

30% eco-resin · 30 % d'éco-résine

10% Thermolite · 10 % de thermolite

## COMFORT TECHNOLOGIES TECHNOLOGIES DU CONFORT

### Cr<sup>+</sup> Noken Maximum Chrome

Noken Maximum Chrome guarantees the beauty, durability and optimum resistance of the chrome finish, thanks to rigorous controls and daily monitoring during the chrome plating process to ensure optimum nickel and chrome thicknesses for each piece.

Noken Maximum Chrome garantit la beauté, la durabilité et la résistance optimale de sa finition chromée, étayée par des contrôles rigoureux et un suivi minutieux durant toute la phase de chromage, qui assure des épaisseurs de nickel et de chrome optimales.

### Noken Smooth Move

Noken Smooth Move technology results in comfortable and soft tap lever operation.

La technologie Noken Smooth Move permet d'actionner la commande de nos robinets d'un mouvement simple et léger.

### Noken Tri-Control

Thanks to our Tri-Control cartridges, customers can regulate the water flow, temperature and outlet by moving the tap lever.

Grâce à nos cartouches Tri-Control, le client peut régler le débit, la température et la sortie de l'eau d'un mouvement de la commande des robinets.

NOKEN BRASSWARE

## Noken Energy

Noken Energy is a new type of jet that surrounds you in a soft and pleasant rain that refreshes and revitalises. Each nozzle has five micro- holes (instead of one) that divide the stream into micro droplets. This creates a new shower sensation that is much more relaxing and silent.

Noken Energy est un nouveau type de jet qui vous enveloppe d'une pluie douce et agréable, fraîche et revitalisante. Chaque tête possède cinq orifices fins (au lieu d'un) qui divisent le jet en micro-gouttes. Cela crée une nouvelle sensation de douche, bien plus relaxante et silencieuse.

Relaxing. Many more micro-drop jets that make the water fall as small and light drops, achieving a much more relaxing and pleasant shower.

Relaxante. Bien plus de jets de micro-gouttes font que l'eau tombe comme de petites gouttes légères, pour offrir une douche beaucoup plus relaxante et agréable.

More silent. water flows quietly from the nozzles and falls gently on you, producing less noise than a standard shower.

Plus silencieuse. L'eau s'écoule silencieusement des têtes et tombe doucement sur vous, produisant moins de bruit qu'une douche classique.

Less splashing. water falls so lightly on your skin that it reduces splashing. This helps you keep the bathroom clean.

Moins d'éclaboussures. L'eau tombe si légèrement sur votre peau que le nombre d'éclaboussures est réduit. Cela vous aide à garder la salle de bains propre.

Easy to clean. Silicone nozzles can be easily cleaned and removing any limescale that may accumulate on them is easy.

Facile à nettoyer. Les têtes en silicone se nettoient facilement en éliminant toute accumulation éventuelle de calcaire.

## Noken Safe Stop

For us, bathroom safety is crucial. This is why Noken's thermostatic taps include the Safe Stop function, which stops the water temperature from exceeding 38°C to ensure safety (especially for children).

This technology will also cut off the hot water supply if the cold water flow is interrupted, avoiding the risk of burns.

La sécurité de votre salle de bains est primordiale pour nous. C'est pourquoi les robinets thermostatiques de Noken incluent donc la fonction Safe Stop, qui bloque la température de l'eau à un maximum de 38 °C pour garantir votre sécurité et surtout celle de vos enfants.

Ce système coupe également l'alimentation en eau chaude en cas d'interruption de l'alimentation en eau froide, afin d'éviter les risques de brûlure.

**NOKEN BRASSWARE**

## Noken Thermostrust

Thanks to the spout, thermostatic taps with Noken Thermostrust technology guarantee the body of the tap stays cold, avoiding any potential burns.

Grâce à leur manteau, les robinetteries thermostatiques équipées de la technologie Noken Thermostrust garantissent que le corps thermostatique reste froid, afin d'éviter les brûlures.

## Selected Raw Material

The internal controls for the selection of the raw material allow to work only with the best fabrication materials for the sanitary ceramics.

Grâce aux contrôles internes sur la sélection des matières premières, nous travaillons uniquement avec les meilleurs matériaux pour la fabrication de la porcelaine sanitaire.

## Compact Ceramics

The material is made at 2250°F, and it allows the perfect compaction of the materials, resulting in the final ceramics with a greater impact resistance.

Furthermore, our sanitary ceramics remains unchanged subjected to thermal shock.

La cuisson du matériau à 1250 °C permet une parfaite homogénéisation du matériau et lui donne une résistance accrue aux impacts.

Notre porcelaine sanitaire reste par ailleurs inaltérable lorsqu'elle est soumise au choc thermique.

## Planimetrics

Noken Ceramic formula allows designs with quality tolerances which are very demanding in planimetrics and surfaces.

La formule Noken Ceramic permet de créer des designs avec des tolérances de qualité très exigeantes en termes de planimétrie et de surface.

## Chemical Resistant

The bathroom is subjected to many chemical products. Due to this, Noken Ceramic has a strong resistance against all those corrosive agents.

La salle de bain est exposée à de nombreux produits chimiques. C'est pourquoi Noken Ceramic est extrêmement résistant à tous les agents corrosifs.

**NOKEN CERAMIC**

## Noken Easy Clean

The sanitary ceramics requires little time and effort for being clean, allowing an easy maintenance and keeping the highest standards.

La porcelaine sanitaire nécessite peu de temps et d'effort pour être nettoyée, ce qui facilite l'entretien et permet de conserver toutes ses garanties.

## Noken Ergonomic

We focus our efforts on innovation and developing products that adapt to our customer's day-to-day needs, seeking ease of use and comfort in every design. Noken Ergonomic toilets and baths are just some of our products that have ergonomic principles at their core.

Nous nous concentrons sur l'innovation et le développement de produits faciles à utiliser, adaptés au quotidien de nos clients, qui misent sur la praticité et le design. Les WC ou les baignoires Noken Ergonomic font partie des produits développés pour une meilleure ergonomie.

## Noken Mute System

Having a silent flush brings a sense of calm and wellbeing to your daily routine. Our cisterns are currently the quietest on the market, with a very low decibel level.

La chasse d'eau silencieuse est ainsi gage de calme et de bien-être au quotidien. Nos chasses d'eau sont aujourd'hui les plus silencieuses du marché grâce à leur faible niveau de décibels.

## Noken Lift-Up

All of our toilet seats incorporate Lift-Up technology. This means you can remove the seat, guaranteeing ceramic sanitaryware that's easier to clean and as hygienic as possible. The toilet system incorporates seats that can be unfastened by gently pulling when the seat is in the open position.

Tous nos sièges de WC intègrent la technologie Lift-Up. Ils sont donc démontables, pour faciliter leur nettoyage et garantir une hygiène irréprochable de la céramique sanitaire. Ce système pour WC se caractérise par des sièges qui se décrochent d'un simple geste de la main quand ils sont placés en position ouverte.

clean  
RIMLESS

## Noken Clean Rimless

This is high-efficiency toilet cleaning technology with an innovative design, with a symmetrical flush for both sides of the walls.

This means the water forcefully enters the toilet and travels 360° degrees around the bowl, even reaching the highest angles, and all without any splashing.

Une technologie de nettoyage pour des WC haute efficacité à la conception innovante, qui assure une chasse d'eau symétrique des deux côtés des parois.

Grâce à elle, l'eau s'engouffre avec force dans la cuvette et y effectue un parcours à 360°, pour en atteindre les recoins les plus hauts, sans éclaboussures.

# NOKEN HEALTH

## HYGIENIC SURFACES SURFACES HYGIÉNIQUES

All our products are developed to guarantee people's health and safety hygiene, through product innovations that make it harder for bacteria to proliferate thanks to the high quality materials used.

Tous nos produits sont développés dans le but de garantir l'hygiène et la santé des utilisateurs au moyen d'innovations produit qui évitent la prolifération des bactéries grâce aux matériaux ultra qualitatifs dont ils sont composés.

## GLAZED COMPACT VITRIFIÉ COMPACT

By means of chemical formulation of Noken Ceramic and its lacquered treatment, it is obtained a vitrified without pores, scratchproof and hypoallergenic.

Noken's glazed porcelain is resistant to chemical agents, detergents and disinfectants according to UNE56867.

Based on its extreme resistance to these tests we can determine the material is suitable as an ANTIBACTERIAL MATERIAL, as it remains unchanged and tolerates heavy cleaning.

Grâce à la formule chimique de Noken Ceramic et à son émailage, on obtient une vitrification sans pores, résistante aux rayures et hypoallergénique.

La résistance aux agressions chimiques, aux détergents et aux désinfectants de la porcelaine vitrifiée Noken Ceramic est garantie par la norme UNE56867.

Ce matériau, qui fait preuve d'une résistance extrême lors de ces tests, peut ainsi être qualifié de MATÉRIAU ANTIBACTÉRIEN, car il n'est aucunement altéré par une désinfection approfondie.

## OXYGEN-RICH MICROBUBBLES

MICRO-BULLES RICHES EN OXYGÈNE

The new Noken Care system is a wellness treatment using oxygen microbubbles with amazing skin treatment benefits. It improves our well-being and nightly rest.

*Le nouveau système Noken Care est un traitement Wellness de micro-bulles d'oxygène avec de grands avantages pour le traitement de la peau. Son utilisation améliore notre bien-être et notre repos nocturne.*

Thanks to the enrichment of water with oxygen, we can achieve optimal oxygenation, regeneration and hydration of the skin.

*Grâce à l'enrichissement de l'eau en oxygène, la peau est oxygénée, régénérée et hydratée de manière optimale.*

It activates the production of collagen in our body, which helps reduce wrinkles and illuminates the skin.

*Active la production de collagène de notre corps, ce qui contribue à réduire les rides et à illuminer la peau.*

It accelerates the skin's cell metabolism, helping to replace dead cells with new ones.

*Accélère le métabolisme des cellules de la peau, les cellules mortes sont remplacées par de nouvelles.*

It increases serotonin levels, improving our well-being and nightly rest.

*Augmente les niveaux de sérotonine, améliorant le bien-être et influençant le repos nocturne.*

## FIZZ - HYDROTHERAPY

FIZZ - HYDROTHERAPIE

Hydrotherapy is that part of physical therapy that uses water in any state, form or temperature to relieve discomfort and promote physical well-being.

*L'hydrothérapie est la partie de la thérapie physique qui utilise l'eau dans n'importe quel état, forme ou température pour soulager l'inconfort et promouvoir le bien-être physique.*

## CHROMOTHERAPY

CHROMOTHERAPIE

It stimulates the senses to reset the imbalances generated by the stress of the day to day and/or to promote the most positive moods through the benefits of colour.

*Stimule les sensations pour rétablir les déséquilibres causés par le stress quotidien et/ou renforcer les humeurs positives grâce aux bienfaits de la couleur.*

# Finish Studio

"Finish Studio is a meticulously selected AESTHETIC that Noken applies to its products as if they were a blank slate."

## ARTISTIC UNIQUE

With an artistic approach and traditional charm, baths, washbasins and shower trays take on new skins, mimicking other surfaces.

The perfect combination of innovation, meticulously selected materials, and a production process in which we pander to every detail, results in natural coloured, beautifully tactile ceramic pieces with unbeatable resistance.

"Finish Studio est un rendu ESTHÉTIQUE soigneusement sélectionné que Noken applique à ses produits, comme s'il s'agissait de toiles blanches."

## ARTISTIQUE INIMITABLE

Les baignoires, lavabos et receveurs de douches revêtent de nouveaux atours et imitent d'autres surfaces, dans un esprit artistique au charme traditionnel.

L'innovation, la minutieuse sélection des matériaux et un processus de production attentif à chaque détail : une formule parfaite pour des pièces céramiques aux couleurs naturelles, agréables au toucher et offrant une série de prestations uniques en termes de résistance.

# Slender

## BASINS LAVABOS

Using a highly complex manual process, the Finish Studio service can be applied to washbasins from the rounded Slender range, maintaining its characteristic thin edge.

Hand-painted ceramic washbasins are unique pieces that rely on the extensive technical knowledge and sensitivity of the artisan working on them: pieces are customised at both a visual and tactile level. A unique, exclusive result.

Le service Finish Studio est appliqué aux lavabos de la série Slender grâce à un processus manuel très complexe qui permet de conserver leur rebord fin caractéristique.

Les lavabos céramiques peints à la main sont des pièces uniques qui exigent de profondes connaissances techniques et une sensibilité très spéciale de la part des artisans. Ces derniers parviennent à personnaliser les pièces depuis une perspective visuelle, qui s'étend également à une expérience tactile individualisée. Un résultat unique inimitable.

Noken Brassware adds Premium finishes to this on-trend colour. Taps, showers and accessories are available in matt black and gloss white, as well as stainless metals, gold, brushed gold, titanium, brushed titanium, copper and brushed copper finishes.

The gloss versions of copper and gold elevate the Slender washbasins, giving your bathroom the total look.

Noken Brassware s'associe à la tendance de la couleur avec ses finitions Premium. Ses robinets, douches, accessoires et compléments se colorent de noir mat et de blanc brillant, qui viennent s'ajouter aux tons métalliques inox, or, or brossé, titane, titane brossé, cuivre et cuivre brossé.

Le cuivre et l'or brillants transcendent les lavabos Slender, pour une salle de bains "total look".

## BATHS · BAIGNOIRES

Finish Studio can apply any colour from the RAL chart, as well as matt metallic copper, titanium and gold colours. The colour is applied to the bath panel by hand using artisanal production processes.

The interior is left white, with metallic accessories that marry perfectly with the finishes of the taps.

Finish Studio s'applique à toutes les couleurs du nuancier RAL et aux couleurs métallisées mates cuivre, titane et or. La couleur s'applique sur le manteau des baignoires grâce à un procédé de production artisanale à forte valeur ajoutée humaine.

L'intérieur reste blanc avec des compléments métalliques qui se marient parfaitement aux finitions de la robinetterie.

# I-SMART

Innovation in the bathroom, for our wellbeing and a more sustainable future.

Our I-Smart products transform daily care into an increasingly more efficient, hygienic and customisable experience with innovative, technological and smart bathroom equipment.

I-Smart bathroom furnishings don't just make your life more comfortable and pleasant, but also offer users a more personalised and practical service: a bathroom for each person.

L'innovation s'invite dans la salle de bains pour garantir notre bien-être et un avenir plus durable.

Les produits I-Smart transforment les toilettes en une expérience toujours plus efficace, hygiénique et personnalisable grâce à des équipements de salle de bains innovants, technologiques et intelligents.

L'équipement de bain I-Smart rend la vie plus confortable et plus agréable, mais permet également d'offrir un service plus personnalisé et plus pratique à l'utilisateur : une salle de bains pour chacun.

# Noken Smart Toilet

## SANITARYWARE SANITAIRE

Aesthetics and technology come together in our ever-evolving toilets.

Users take control with Noken Smart Toilets. These solutions offer endless functions depending on the model, such as temperature control, different washing zones, drying, lighting and odour removal, among other features.

The toilets offer improved personal hygiene and comfort thanks to the various programmes, for a fresh and natural user experience.

Les nouveaux WC associent esthétique et technologie.

Noken Smart Toilets offre une nouvelle approche des toilettes où l'utilisateur prend le contrôle. Elles offrent un large éventail de fonctionnalités, en fonction du modèle : contrôle de la température, différentes zones de lavage, de séchage, d'éclairage et d'élimination des odeurs, entre autres.

Des sanitaires qui permettent d'améliorer l'hygiène personnelle et le confort d'utilisation grâce aux programmes qu'ils intègrent, pour une expérience plus fraîche et plus naturelle.

# Noken I-Mirror

## MIRRORS MIROIRS

Noken's multifunctional I-Mirror includes additional features that will enhance the user's experience in the bathroom. These include an on/off sensor, LED

light edges, an anti-misting system and bluetooth connection to your phone.

Les miroirs multifonctions Noken I-Mirror offrent des caractéristiques supplémentaires qui améliorent l'expérience de l'utilisateur dans la salle de bains : capteur on/off, éclairage LED sur tout le périmètre, connexion bluetooth avec votre mobile ou système anti-buée.

Our Touchless product range aims to minimise and even omit the user's contact with bathroom equipment, with everything done using touchless technology.

Noken can offer a wide range of zero contact products, thanks to sensors, infrared and all the latest technologies. At its heart, the need to substantially reduce the number of microorganisms, viruses and bacteria that we're exposed to in everyday life.

La gamme de produits Touchless vise à minimiser voire à supprimer le contact avec l'équipement de salle de bains, qui est actionné grâce à un capteur de proximité.

Capteurs, infrarouges et technologies de pointe permettent à Noken de proposer un large éventail de produits sans contact. Ce système permet de réduire sensiblement la quantité de micro-organismes, de virus et de bactéries auxquels nous sommes exposés quotidiennement.

## ACCESSORIES ACCESSOIRES

In line with the latest health and safety protocols, standout products include our sensor activated touchless soap and antibacterial gel dispensers

Dans le cadre des protocoles de sécurité et de protection les plus récents, on peut souligner les distributeurs de savon ou de gel antibactérien activés par un capteur de proximité.

## BRASSWARE ROBINETTERIE

Our Touchless technology sensor taps detect movement under the spout and an infrared sensor activates automatically, supplying the water needed for each use.

These tap systems were initially in high demand for public bathrooms, airports, hotels and sports facilities, but thanks to their sterile, 100% hygienic properties and new designs, they're now one of the most hygienic solutions you could have in the home.

Les robinets équipés de capteurs dotés de la technologie Touchless détectent la présence des mains sous le robinet. Le capteur à infrarouge l'active alors automatiquement et fournit la quantité d'eau nécessaire à chaque utilisation.

Bien que ces systèmes de robinetterie soient très demandés dans les toilettes publiques, les aéroports, les hôtels ou les centres sportifs, leurs qualités aseptiques, 100 % hygiéniques et leurs nouveaux designs en font une solution d'hygiène très populaire dans les habitations.

## SANITARYWARE SANITAIRE

Noken Smart Toilets, which use water for cleaning, are - like other toilets - operated using a flush plate on the wall. You can however use a touchless infrared sensor for flushing.

Any toilet or urinal can be installed with infrared technology to minimise contact.

Les toilettes Noken Smart Toilets, qui effectuent un nettoyage à l'eau, s'activent comme les autres en appuyant sur une plaque. Cependant, la chasse peut également s'activer sans contact grâce à un capteur à infrarouge.

N'importe quel WC ou urinoir peut être équipé d'un capteur à infrarouge afin de minimiser les contacts.

For installation in wall frames/cisterns, check the maximum installation range of the pipes already included (drainage and supply) with the dimensions indicated in their respective drawings:

Drainage connection pipe: If a longer pipe length is required, up to a maximum installation range of 180 mm, please request the pipe corresponding to the code 100213056.

Supply pipe: If a longer pipe length is required, up to a maximum installation range of 120 mm, please request the pipe corresponding to the code 100213068.

Pour l'installation sur des châssis/citernes, vérifiez la plage maximale d'installation des tubes déjà inclus (évacuation et alimentation) avec les cotes indiquées sur leurs plans respectifs :

Tuyau de raccordement de vidange : si vous avez besoin d'une longueur de tube supérieure, et pour une plage maximale d'installation de 180 mm, demandez le tube correspondant au code 100213056.

Tube d'alimentation : si vous avez besoin d'une longueur de tube supérieure, et pour une plage maximale d'installation de 120 mm, demandez le tube correspondant au code 100213068.

## NOKEN CLEAN RIMLESS

### EFFICIENT FLUSH

This technology uses three water streams for flushing all the inside of the toilet, enhancing the product's efficiency and getting to all corners.  
Grâce à trois sorties d'eau, cette technologie rince tout l'intérieur de la cuvette en améliorant l'efficacité du produit pour arriver dans tous les coins.

### EASY CLEAN

The elimination of the flange guarantees greater continuity of the surfaces inside the toilet, easing its cleaning and a lesser use of disinfectants.  
L'élimination de la bride assure une meilleure continuité des surfaces de l'intérieur de la cuvette. Cela permet de faciliter le nettoyage tout en utilisant moins de désinfectants.

### NO SPLASH

The accurate conduction of the water on the surfaces of the bowl of the toilet, with the right strength, confers an exceptional operation without splashing.  
L'acheminement précis de l'eau sur les surfaces de la cuvette avec la force adaptée permet un fonctionnement exceptionnel et sans éclaboussures.

### Noken CERAMIC

A special glaze that, thanks to ceramic firing at 1250 °C, makes it solid and unalterable. A totally hygienic barrier that creates a smooth surface.  
Un émail spécial qui, grâce à la cuisson de la céramique à 1250 °, la rend solide et inaltérable. Une barrière totalement hygiénique qui crée une surface lisse.

### MORE SILENT

Thanks to its flushing system, it increases comfort as it significantly reduces the noise of flushing operations.  
Grâce à son système d'évacuation, il améliore le confort du produit en réduisant considérablement le bruit de la chasse d'eau.

### INVISIBLE FIXING

The innovative concealed fixing for suspended toilets by Noken gives the product greater visual cleanliness, allowing for easier installation and higher safety.  
Grâce à la nouvelle fixation invisible sur les cuvettes suspendues de Noken, le produit procure une sensation de propreté, tout en étant plus facile à installer et plus sûr.

For installation in wall frames/cisterns, check the maximum installation range of the pipes already included (drainage and supply) with the dimensions indicated in their respective drawings:

Drainage connection pipe: If a longer pipe length is required, up to a maximum installation range of 180 mm, please request the pipe corresponding to the code 100213056.

Supply pipe: If a longer pipe length is required, up to a maximum installation range of 120 mm, please request the pipe corresponding to the code 100213068.

Pour l'installation sur des châssis/citernes, vérifiez la plage maximale d'installation des tubes déjà inclus (évacuation et alimentation) avec les cotes indiquées sur leurs plans respectifs :

Tuyau de raccordement de vidange : si vous avez besoin d'une longueur de tube supérieure, et pour une plage maximale d'installation de 180 mm, demandez le tube correspondant au code 100213056.

Tube d'alimentation : si vous avez besoin d'une longueur de tube supérieure, et pour une plage maximale d'installation de 120 mm, demandez le tube correspondant au code 100213068.

# NOKEN ENERGY PRODUCT RANGE · GAMME NOKEN ENERGY

Noken Energy is a new type of jet that surrounds you in a soft and pleasant rain that refreshes and revitalises. Each nozzle has five micro-holes (instead of one) that divide the stream into micro droplets. This creates a new shower sensation that is much more relaxing and silent.  
*Noken Energy est un nouveau type de jet qui vous enveloppe d'une pluie douce et agréable, fraîche et revitalisante. Chaque tête possède cinq orifices fins (au lieu d'un) qui divisent le jet en micro-gouttes. Cela crée une nouvelle sensation de douche, bien plus relaxante et silencieuse.*

Relaxing. Many more micro-drop jets that make the water fall as small and light drops, achieving a much more relaxing and pleasant shower.  
*Relaxante. Bien plus de jets de micro-gouttes font que l'eau tombe comme de petites gouttes légères, pour offrir une douche beaucoup plus relaxante et agréable.*

Less splashing, water falls so lightly on your skin that it reduces splashing. This helps you keep the bathroom clean.  
*Moins d'éclaboussures. L'eau tombe si légèrement sur votre peau que le nombre d'éclaboussures est réduit. Cela vous aide à garder la salle de bains propre. Relaxante. Bien plus de jets de micro-gouttes font que l'eau tombe comme de petites gouttes légères, pour offrir une douche beaucoup plus relaxante et agréable.*

More silent, water flows quietly from the nozzles and falls gently on you, producing less noise than a standard shower.  
*Plus silencieuse. L'eau s'écoule silencieusement des têtes et tombe doucement sur vous, produisant moins de bruit qu'une douche classique.*

Easy to clean. Silicone nozzles can be easily cleaned and removing any limescale that may accumulate on them is easy.  
*Facile à nettoyer. Les têtes en silicone se nettoient facilement en éliminant toute accumulation éventuelle de calcaire.*

## LIGHT

Acrylic shower trays with straight lines and wrap-around form. It's biggest advantage is the versatility in format availability, becoming an option adaptable to all type of bathroom spaces, square or rectangular, corner formats, in curved or rectaline forms, and a wide variety of mesuares

Receveur de douche acrylique de lignes droites. Le grand avantage est la large variété de dimensions et formats, lui permettant de s'adapter ainsi a tout type d'espace dans les salle de bain, carré, rectangulaire ou même angulaire. De lignes arrondies au droite et disponibles dans une large variété de dimensions.

The finish refers firstly to the finish of the bathtub and secondly to the finishes of the accessories it includes. For bathtubs painted on the outside, please check it with the sales department • La finition indiquée fait référence dans un premier temps à la finition de la baignoire et ensuite à la finition des accessoires qui la composent. Pour les baignoires peintes sur la partie extérieure, merci de bien vouloir consulter le département commercial.

The finish refers firstly to the finish of the bathtub and secondly to the finishes of the accessories it includes. For bathtubs painted on the outside, please check it with the sales department. • La finition indiquée fait référence dans un premier temps à la finition de la baignoire et ensuite à la finition des accessoires qui la composent. Pour les baignoires peintes sur la partie extérieure, merci de bien vouloir consulter le département commercial.

## INTRODUCTION · INTRODUCTION

### BENEFITS OF WHIRL TUBS BÉNÉFICIE DU HYDROMASSAGE

A whirl tub is much more than a luxurious accessory for your home. Bathing in whirl bath tubs for a period of time has a number of benefits, both physical and mental.

*L'hydro massage est recommandé par beaucoup de professionnels pour combattre la maladie de notre société : le stress. Les médecins le recommandaient de manière thérapeutique ; dans l'actualité, il s'agit d'une recommandation préventive. L'hydro massage peut également combattre l'anxiété et l'insomnie puisque cela fait du bien non seulement à notre corps mais aussi à notre esprit.*

Bubble baths have very positive effects on arterial circulation. Pressure activates the circulation of the blood and also benefits the cardiac activity. It also allows relaxation of the muscles and eliminates toxins when opening the pores. These baths are good for relieving stomach ulcers and for recovering from fractures and muscle injuries.

Cellulite is also combated thanks to the pressure jets of these bathtubs. It is good to take a bath after practicing sports.

*Les bains à bulles exercent des effets très positifs sur la circulation sanguine. La pression active la circulation sanguine et aide l'activité cardiaque. Cela permet aussi de relaxer les muscles et d'éliminer les toxines en ouvrant les pores. Ce type de bains permet de soulager les ulcères d'estomac et de récupérer de fractures et lésions musculaires.*

### BENEFITS OF CHROMOTHERAPY BIENFAITS DE LA CHROMOTHÉRAPIE

Chromotherapy is not only a beautiful play of light and colours. There are several studies certifying the full functionality of this practice, and helps establishing emotional balance for dealing with everyday problems. From a range of cold colours, so related to relaxation and tranquility, to the vital energy given by warm colours, chromotherapy, together with the effect of the different outlets, can lead to highly significant benefits for body and mind.

*La chromothérapie n'est pas uniquement un jeu de lumières et de couleurs. Plusieurs études certifient que cette pratique est entièrement fonctionnelle, car elle peut contribuer à établir un équilibre émotionnel qui aide à affronter les problèmes quotidiens. Que ce soit avec une gamme de couleurs froides qui apportent détente et tranquillité, ou avec des couleurs chaudes qui donnent de l'énergie vitale, cette pratique, associée aux effets des sorties d'eau variées, peut apporter des bienfaits très importants pour le corps et l'esprit.*

RECOMMENDATIONS FOR BATHING  
RECOMMANDATIONS DE COMMENT UTILISER LE BAIN

1

Enjoy the pleasant sensations of air jets with the massaging power of whirl jets  
*Submergez votre corps autant que vous pouvez et relaxez vous.*

2

Select carefully the intensity and position of the jets to your personal preferences.  
*Sélectionner l'intensité de pression et la position des buses.*

3

Do not use the whirl tub while under the influence of drugs or alcohol.  
*Si vous êtes très fatigué ou sous l'effet de l'alcool ou de médicaments, ne prenez pas votre bain afin d'éviter de vous évanouir.*

4

Do not use the whirl tub when you feel sleepy  
*Si vous avez une sensation de sommeil, sortez rapidement de votre bain.*

5

Do not use massaging jets during pregnancy  
*Si vous êtes enceinte, ne pas activer les buses d'hydro massage non recommandées.*

6

The product is designed to be used only by adults. Children, elderly or infirm individuals should only use the whirl tub under supervision.  
*Attention aux enfants, toujours les contrôler s'ils sont proche ou dans la baignoire.*

7

Make sure you do not activate the hydro system until the tub is filled with sufficient water.  
*Ne pas activer le système d'hydro massage avant d'avoir un niveau minimum deau.*

8

The recommended bathing time is 15 to 20 minutes.  
*Ne pas rester des heures dans le bain. Vous pouvez avoir une baisse de tension. La durée recommandée est de 15-20 minutes. Faites attention au fait que, plus l'eau est froide, plus le bain doit être de courte durée.*

## ELECTRONICS OPTIONS · OPTIONS ÉLECTRONIQUES

## HYDRO

## SCREEN KEYPAD · CLAVIER

Extra-slim glass keypad with led signal to activate the HYDRO feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product. *Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction HYDRO. L'encre de la sérigraphie est traitée à une température de 140 °, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.*

## PUMP · POMPE

With 800W of power, it has a perfect performance for providing a relaxing massage that, together with its low noise level, ensures optimum comfort. The pump is equipped with an electronic level sensor which prevents it from functioning if the necessary minimum water level has not been reached. *D'une puissance de 800 W, elle possède un rendement idéal pour effectuer un massage relaxant avec un faible niveau sonore, ce qui garantit un confort optimal. La pompe est équipée d'un capteur de niveau électronique pour empêcher la mise en route si le niveau d'eau minimum nécessaire n'est pas atteint.*

## SUCTION · ASPIRATION

With low water retention, the suction mouth meets the highest quality standards. Its safety system prevents any potential blockage and, thanks to its high-quality decorative chroming, any obstruction of the hydraulic circuit is prevented. *Grâce à une faible rétention d'eau, la bouche d'aspiration est conforme aux standards de qualité les plus stricts. Son système de sécurité empêche tout blocage éventuel et son cache chromé de qualité supérieure permet d'éviter toute obstruction du circuit hydraulique.*

## HYDRO JET · JET HYDRO

The ergonomics of the hydro jet makes it blend with the bathtub walls, offering a unique massage. Injectors can be tilted manually up to 45° and are therefore completely adjustable. This feature allows the user to choose the exact place where they want to receive the massage. In addition, the flat design of the jets allows the user to get the most out of the feeling provided by the water in contact with the skin.

The trim and the jet nozzle are easily removed, allowing for easy cleaning and replacement (click-type). The pipe emptying system is activated from the keypad. *L'ergonomie du jet hydro, qui se fonde avec les parois de la baignoire, permet d'offrir un massage unique. Les injecteurs, totalement orientables, peuvent être inclinés manuellement jusqu'à 45 °. Grâce à cette caractéristique, l'utilisateur peut choisir l'endroit exact où il souhaite se faire masser. Le design plat des jets permet en outre à l'utilisateur de profiter au maximum de la sensation qu'offre le contact de l'eau avec la peau. Le cache et la buse du jet sont faciles à démonter (système à clic), ce qui facilite le nettoyage et le remplacement. On déclenche le système de vidage des tuyaux depuis le clavier.*

## FUSION

## SCREEN KEYPAD · CLAVIER

Extra-slim glass keypad with led signal to activate the HYDRO and AIR feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product. *Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction HYDRO et AIR. L'encre de la sérigraphie est traitée à une température de 140 °, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.*

Le cache et la buse du jet sont faciles à démonter (système à clic), ce qui facilite le nettoyage et le remplacement. On déclenche le système de vidage des tuyaux depuis le clavier.*

## BLOWER · BLOWER

With 400W power, the blower makes the air jet inside the bathtub create a soft and enveloping massage. The air circuit installation system itself, and the inclusion of a check valve, ensure that water can never go back and reach the blower. *D'une puissance de 400 W, le blower crée à l'intérieur de la baignoire un jet d'air qui réalise un massage doux et enveloppant. Grâce au système d'installation du circuit d'air et au clapet anti-retour intégré, l'eau ne peut jamais revenir et atteindre le blower.*

## AIR JET · JET AIR

The ergonomic design of air jets offers the best massage, providing all the benefits of a professional massage. The high-gloss chromed brass jets are located at the base of the bathtub. Its extra-slim design allows for an unbeatable feeling when the air comes in contact with the skin. The pipe emptying system is activated from the keypad. *Le design ergonomique des jets d'air permet un massage optimal qui offre tous les bienfaits d'un massage professionnel. Les jets en laiton chromé finition haute brillance sont situés à la base de la baignoire. Leur design ultra-plat procure une sensation incomparable lorsque l'air entre en contact avec la peau. On déclenche le système de vidage des tuyaux depuis le clavier.*

**ELECTRONICS OPTIONS OPTIONS ÉLECTRONIQUES**

**CARE+**

SCREEN KEYPAD *CLAVIER*

Extra-flat crystal keyboard with independent LED indicator lights to activate CARE, FIZZ and CHROMOTHERAPY functions. The screen printing ink is applied at 140°, with special anti-humidity protection for the keyboard and to guarantee the durability of the product. *Clavier en verre extra-plat avec LED de signalisation indépendantes pour l'activation des fonctions CARE, FIZZ et CHROMATHÉRAPIE. L'encre de sérigraphie est traitée à une température de 140°C, avec un revêtement spécial anti-humidité pour protéger le clavier et garantir la durabilité du produit.*

CARE PUMP *POMPE CARE*

High-power, high-pressure pump, specially designed for the CARE function, which generates micro-oxygenating bubbles for skin care. The system is equipped with an electronic level sensor that prevents the pump from starting if the minimum water level is not reached. *Avec une puissance et une pression élevées, spécialement conçues pour sa fonction CARE, il génère des microbulles oxygénantes pour les soins de la peau. Le système est équipé d'un capteur de niveau électronique qui empêche la pompe de démarrer si le niveau d'eau minimum requis n'est pas atteint.*

CARE ASPIRATION *ASPIRATION CARE*

With low water retention, the suction nozzle meets the highest quality standards. Its safety system prevents any possible blockage and its trim prevents any obstruction of the hydraulic circuit. *Avec une faible rétention d'eau, la buse d'aspiration répond aux normes de qualité les plus élevées. Son système de sécurité empêche tout blocage éventuel, son cache empêche toute obstruction du circuit hydraulique.*

CARE JET *JET CARE*

In operation, it generates a wide cone of micro-bubbles that spread quickly throughout the water in the bathtub, giving the surface a milky-white appearance. The contact of the micro bubbles with the user's skin produces a tickling sensation. The flat, ergonomically designed jet fits perfectly into the sides of the bathtub, contributing to its elegant appearance. The jet trim can be easily removed, facilitating cleaning and replacement. *Pendant son fonctionnement, il génère un grand cône de microbulles qui, en peu de temps, se répandent sur tout le volume d'eau de la baignoire et recouvrent toute la baignoire d'un aspect blanc laiteux. Une sensation de picotement effervescent est ressentie lorsque les micro-bulles entrent en contact avec la peau de l'utilisateur. L'ergonomie plate du jet lui permet de s'adapter parfaitement aux parois de la baignoire donnant un rendu esthétique approprié. Le cache du jet peut être facilement retiré pour être nettoyé et remplacé.*

FIZZ BLOWER *BLOWER FIZZ*

Using very little power, the blower pushes the air bubbles round inside the bathtub, as they rise from the jet to the surface. The air circuit is designed to ensure that water can never flow back into the blower. *Avec une puissance minimale, le FIZZ pousse les bulles d'air à l'intérieur de la baignoire en les faisant avancer verticalement en rond du jet jusqu'à la surface. Le système d'installation du circuit d'air lui-même garantit que l'eau ne peut jamais remonter et atteindre le FIZZ.*

FIZZ JET *JET FIZZ*

Designed to massage the user's body with perfect round bubbles that produce a gentle tickling sensation. The high-gloss chrome-plated brass jets are positioned on the base of the bathtub. The extra-flat design allows for an improved sensation when air comes into contact with the skin. *Conçu pour générer un massage basé sur des bulles rondes parfaites qui produisent une douce sensation de picotement lorsqu'elles arrivent sur le corps de l'utilisateur. Les jets en laiton chromé brillant sont disposés dans la partie inférieure de la baignoire. Sa conception extra-plat permet une meilleure sensation lorsque l'air entre en contact avec la peau.*

CHROMOTHERAPY *CHROMOTHÉRAPIE*

Thanks to the six powerful chromotherapy LED lights, the user can enjoy special lighting effects. The smooth, pre-programmed change between colours enables the user to experience the emotions and well-being associated with each of them. You can also stop the programme if you wish, staying with the colour that relaxes you most. *Grâce aux six puissants spots LED de chromothérapie, l'utilisateur peut profiter des bienfaits des jeux de lumière. Le passage en douceur préprogrammé entre chaque couleur permet à l'utilisateur de ressentir les émotions et le bien-être produits par chaque couleur. En outre, vous avez la possibilité d'arrêter le programme quand vous le souhaitez, afin de vous arrêter à la couleur qui vous apporte le plus de détente.*

**OUTDOOR AIR**

SCREEN KEYPAD *CLAVIER*

Extra-slim glass keypad with led signal to activate the AIR feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product. *Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction AIR. L'encre de la sérigraphie est traitée à une température de 140 °, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.*

BLOWER *BLOWER*

With 400W power, the blower makes the air jet inside the bathtub create a soft and enveloping massage. The air circuit installation system itself, and the inclusion of a check valve, ensure that water can never go back and reach the blower. *D'une puissance de 400 W, le blower crée à l'intérieur de la baignoire un jet d'air qui réalise un massage doux et enveloppant. Grâce au système d'installation du circuit d'air et au clapet anti-retour intégré, l'eau ne peut jamais revenir et atteindre le blower.*

JET AIR EXTERIOR *JET AIR EXTÉRIEUR*

The ergonomic design of the air jets offers an optimal massage providing all the benefits of a professional massage. The jets in white ABS, located at the base of the bathtub, produce an unbeatable sensation when the air comes into contact with the skin. The pipe emptying system is activated from the keyboard. *La conception ergonomique des jets d'air offre un massage optimal offrant tous les avantages d'un massage professionnel. Les jets en ABS blanc, situés à la base de la baignoire, produisent une sensation imbattable lorsque l'air entre en contact avec la peau. Le système de vidage des tuyaux est activé à partir du clavier.*

**OUTDOOR AIR+W**

SCREEN KEYPAD *CLAVIER*

Extra-slim glass keypad with led signal to activate the AIR feature. Screen printing ink is treated at a temperature of 140 °C, with a special anti-moisture protection for protecting the keypad and ensuring the durability of the product. *Clavier en verre ultra-plat avec LED de signalisation pour activer la fonction AIR. L'encre de la sérigraphie est traitée à une température de 140 °, avec une protection spéciale anti-humidité pour protéger le clavier et garantir la durée de vie du produit.*

# INTRODUCTION · INTRODUCTION

## How does a towel warmer work?

The water that circulates inside the towel warmer transmits heat by convection: the hot water rises, and the cold water descends. The heat is transferred to the bathroom by radiation through the tubes.

- What types of towel warmers are included in our catalogue?

- Water towel warmers (,)
- With a simple heating element (E1), (E2)
- With heating element and thermostat for liquid temperature (EL1), (EL2)
- With heating element and thermostat for room temperature (ET1), (ET2)
- Mixed with simple heating element (M1), (M2)
- Mixed with heating element and thermostat for liquid temperature (ML1), (ML2)
- Mixed with heating element and thermostat for room temperature (MT1), (MT2)

The difference between class 1 and class 2 is that class 2 complies with the specific French regulations for heating elements.

## Comment fonctionne un sèche serviette?

*Le liquide qui circule à l'intérieur du sèche serviette transmet de la chaleur par convection : le liquide chaud monte et le liquide froid descend. La chaleur est transmise à la salle de bains par rayonnement à travers les tubes.*

*Quels types de sèche serviettes trouvez-vous dans notre catalogue ?*

- À eau (,)
- Avec résistance simple (E1), (E2)
- Avec résistance et thermostat pour réglage température liquide (EL1), (EL2)
- Avec résistance et thermostat pour réglage température ambiante (ET1), (ET2)
- Mixte avec résistance simple (M1), (M2)
- Mixte avec résistance et thermostat pour réglage température liquide (ML1), (ML2)
- Mixte avec résistance et thermostat pour réglage température ambiante (MT1), (MT2)

*La différence entre les catégories 1 et 2 est que la catégorie 2 satisfait aux exigences spécifiques de la réglementation française pour la résistance.*

## How do the water versions work?

What type of installations can I find?

The boiler heats the water, and this enters the towel warmer through the inlet valve. The hot water reaches the top of the towel warmer by convection, is distributed through the tubes, and on cooling descends and exits the towel warmer through the lockshield valve, from where it returns to the boiler, where the cycle begins again.

All of the energy in the form of heat that is emitted through the towel warmer tubes to the exterior by radiation is the energy that the water has lost, and as a result represents the calorific energy the boiler will have to produce again in order to continue heating the bathroom.

There are two types of water towel warmers: single tube and dual tube.

### A. - Single tube installation diagram

- Schéma d'installation monotube

## Comment fonctionnent les versions à eau?

QUELS TYPES D'INSTALLATIONS TROUVE-T-ON?

*La chaudière chauffe l'eau qui pénètre à l'intérieur du sèche serviette par la vanne d'entrée. Par convection, l'eau chaude parvient à la partie supérieure du sèche serviette, se distribue dans les tubes et, en se refroidissant, redescend et ressort du sèche serviette à travers le détendeur, pour ensuite regagner la chaudière et commencer un nouveau cycle.*

*Toute l'énergie transmise vers l'extérieur sous forme de chaleur par rayonnement à travers les tubes du sèche serviette est l'énergie que le liquide a perdue et, par conséquent, l'énergie calorifique que la chaudière devra produire de nouveau pour continuer à chauffer la salle de bains.*

*Il existe deux types de sèche serviettes à eau : monotube et bitube.*

### B. - Dual tube installation diagram

- Schéma d'installation bitube

## - How does the electric version work?

An electric heating element heats the antifreeze liquid (water + alcohol = glycol). As the liquid is heated, it rises by convection to the upper part of the towel warmer, and is distributed along the horizontal tubes. The liquid which is at a lower temperature moves to the lower part of the towel warmer, and comes into contact with the heating element. As it heats up, it rises to the top of the towel warmer, and the liquid which was hot and has released heat by radiation through the towel warmer tubes cools and descends to the lower part. As a result, there is always a cycle of glycol heating up and cooling down, emitting heat through the towel warmer tubes.

The electric towel warmers can be thermostatic (ET1 / EL1) or simple (E1).

Simple towel warmers do not have any type of operating controls. They operate until the simple heating element is activated and turns off. After a while, the heating element turns back on until it turns off again.

One feature of thermostatic towel warmers is that they do not operate constantly at their full power: they operate in the same way as the previous type, but do not need to reach their maximum operating temperature to turn off and back on again. They include a programmer.

## - Comment fonctionne la version électrique?

*Une résistance électrique chauffe le liquide antigel (eau + alcool = glycol). En étant chauffé, le liquide monte par convection vers la partie haute du sèche serviette et se distribue dans les tubes horizontaux. Le liquide dont la température est inférieure descend vers la partie basse du sèche serviette et est chauffé par la résistance. En étant chauffé, il remonte vers la partie supérieure du sèche serviette, et le liquide qui était chaud et a déjà transmis de la chaleur par rayonnement à travers les tubes du sèche serviette, s'est refroidi et redescend dans la partie inférieure. De cette manière, il y a toujours un cycle actif de glycol que se chauffe/refroidit et émet de la chaleur à travers les tubes du sèche serviette.*

*Les sèche serviettes électriques peuvent être à thermostat (ET1 / EL1) ou simples (E1).*

*Le fonctionnement des sèche serviettes simples n'est pas réglable. Ils fonctionnent continuellement jusqu'à ce que la résistance simple dont ils sont équipés se déclenche et s'éteint. Cette dernière recommence à chauffer après un certain temps, puis elle s'éteint de nouveau.*

*Les sèche serviettes à thermostat se distinguent par le fait de ne pas fonctionner en permanence à pleine puissance, c'est-à-dire qu'ils fonctionnent de la même manière que les autres, mais qu'ils n'ont pas besoin de parvenir à un maximum pour ensuite s'éteindre, puis fonctionner de nouveau. Ils sont équipés d'un programmeur.*

# INTRODUCTION · INTRODUCTION

## - How does the mixed version work?

The mixed towel warmer should operate, whenever possible, with the central heating circuit of the home. It has the advantage that it can be used when the central heating is not turned on (normally during the summer months). This is possible because they include a simple or thermostatic heating element, depending on whether the towel warmer is to be programmed or not. The following safety guidelines must always be taken into account when using the electric heating element:

- The towel warmer must be full of water
- The central heating must be turned off.
- Close the inlet valve so that water is not circulating inside the system.

The mixed towel warmers are also classified as vertical single tube, horizontal single tube and dual tube, and it is important to consider the criteria described above in order to identify one type of installation or the other.

## - Description of the electric accessories

- Cap: element that hermetically seals the towel warmer.
- Purge valve: element that hermetically seals the towel warmer, but also allows it to be purged.
- Heating element: element that heats the liquid inside the towel warmer by consuming electrical energy.
  - a\_ Class I: heating element that complies with safety class I (discharges to earth)
  - b\_ Class II: heating element that complies with safety class II, obligatory in France (discharges on the element itself).
- Thermostat: electric element that automatically regulates the power supplied by the heating element in order to maintain a constant temperature in the room.

Class I Simple Heating element + Thermostat  
Résistance simple Classe I + Thermostat

## - Comment fonctionne la version mixte?

*Le sèche serviette mixte doit fonctionner si possible avec le circuit de chauffage central du logement. Ces sèche serviettes présentent l'avantage de pouvoir être employés même si le chauffage central n'est pas utilisé (normalement pendant la saison estivale). Ceci est possible grâce à une résistance simple ou avec thermostat, selon qu'une programmation est nécessaire ou non. Les précautions suivantes doivent être prises pour utiliser la résistance électrique:*

- Le sèche serviette doit être plein d'eau.
- Le chauffage central doit être éteint.
- Fermer le robinet d'entrée pour empêcher l'eau de circuler à l'intérieur du système.

*Les sèche serviettes mixtes sont également classés en monotubes verticaux, monotubes horizontaux et bitubes, et les critères décrits plus haut doivent être pris en considération pour pouvoir identifier une installation ou une autre.*

## - Description des accessoires électriques

- Bouchon : élément qui ferme hermétiquement le sèche serviette.
- detent : élément qui ferme hermétiquement le sèche serviette et permet en même temps de purger celui-ci.
- Résistance : élément qui chauffe le liquide contenu dans le sèche serviette en consommant de l'énergie électrique.
  - a\_ Classe I : résistance qui répond à la classe de sécurité I (décharge à la terre).
  - b\_ Classe II : résistance qui répond à la classe de sécurité II, obligatoire en France (décharge sur l'élément lui-même).
- Thermostat : élément électrique qui régule automatiquement la puissance fournie par la résistance pour maintenir la température constante dans la pièce d'habitation.

## - Description of hydraulic accessories

- Cap: element that hermetically seals the towel warmer.
- Purge valve: element that hermetically seals the towel warmer, but also allows it to be purged.
- Valve: element that allows water from the boiler to enter the towel warmer.
  - a\_ Dual tube: installation in which water enters and leaves the towel warmer through different connections. Requires an inlet valve and a lockshield valve on the outlet.
  - b\_ Single tube: installation in which water enters and leaves the towel warmer through the same connection. Requires a specific valve that allows water to exit the towel warmer at the same time.
- Lockshield valve: element that allows water to leave the towel warmer, and then return to the boiler.
- Connector joint: element to connect the valve or lockshield valve and the tubing in the heating installation. These will depend on the diameter and material used for the tubing in the installation.

## - Description des accessoires hydrauliques

- Bouchon : élément qui ferme hermétiquement le sèche serviette.
- detent : élément qui ferme hermétiquement le sèche serviette et permet en même temps de purger celui-ci.
- Vanne : élément qui permet l'entrée de l'eau provenant de la chaudière dans le sèche serviette.
  - a\_ Bitube : installation dans laquelle l'entrée et la sortie de l'eau du sèche serviette s'effectuent par des raccords différents. Elle nécessite une vanne à l'entrée et un détendeur à la sortie.
  - b\_ Monotube : installation dans laquelle l'entrée et la sortie de l'eau du sèche serviette s'effectuent par le même raccordement. Elle nécessite une vanne spécifique permettant en même temps la sortie de l'eau.
- Détendeur : élément qui permet la sortie de l'eau du sèche serviette et de la renvoyer vers la chaudière.
- Raccord d'union : élément qui permet l'union entre la vanne ou le détendeur et la tuyauterie de l'installation de chauffage. Son diamètre et son matériau dépendent de la tuyauterie de l'installation.

# INTRODUCTION · INTRODUCTION

- Description of accessories for the mixed version

- T-connector: allows a dual tube valve and electric heating element to be installed at the same time.

- Description des accessoires pour la version mixte

- Raccord en T: permet d'installer en même temps une vanne bitube et une résistance électrique.

T-connector  
Raccord en T

When I order a water towel warmer (,), what does it include? What additional accessories do I have to order?

Si je commande un sèche serviette à eau (,), que comprend-il, quels compléments dois-je commander ?

1. Single tube vertical/horizontal towel warmer for central heating installation.

1.- sèche serviette pour chauffage central installation monotube verticale / horizontale.

2. Dual tube towel warmer for central heating installation

2.- sèche serviette pour chauffage central installation bitube

The drain and wall fixings are included in the water towel warmer. The fittings, the vertical or horizontal single-tube valves are always in chrome, as is the 1/2" towel warmer cap. The valve and lockshield codes shown here are those for the chrome finish.

Le detent et les fixations murales sont inclus avec les sèche-serviettes à eau. Le raccords, la vanne monotube verticale ou horizontale sont toujours en chromé, tout comme le bouchon 1/2" du sèche-serviettes. Les codes de la vanne et du détendeur montrés ici sont ceux de la finition chromée.

# INTRODUCTION · INTRODUCTION

When I order a mixed towel warmer (M1, M2), (ML1, ML2) or a mixed towel warmer with thermostat (MT1, MT2), what does it include? What additional accessories do I have to order?

*Sij je commande un sèche serviette mixte (M1, M2), (ML1, ML2) ou (MT1, MT2), que comprend-il, quels compléments additionnels dois-je commander ?*

## 3.- Mixed towel warmer for horizontal/vertical single tube installation.

## 3.- sèche serviette mixte pour installation monotube horizontale / verticale.

The codes for the valves and lockshield valves shown here are in chrome. For prices for connectors in other finishes, see the comments for the water towel warmers shown above.

*Les codes indiqués des vannes et des raccords sont valables pour la finition chrome. Pour pouvoir établir un devis des raccords dans d'autres finitions, il suffit de tenir compte des indications précédentes pour les sèche serviettes à eau.*

In both cases (horizontal and vertical single tube), it does not matter if the valve and heating element are on the left or on the right; they can be installed on either side without affecting the operation of the towel warmer in any way.

*Dans les deux cas (monotube horizontal et monotube vertical), il est indifférent que la vanne et la résistance soient installées à droite ou à gauche, n'importe lequel de ces emplacements est parfaitement valable et n'affecte d'aucune manière le fonctionnement du sèche serviette.*

## 4.- Mixed towel warmer for dual tube installation

## 4.- sèche serviette mixte pour installation bitube

# INTRODUCTION · INTRODUCTION

## 5.- Electric towel warmer. Includes all the necessary componets to assemble.

In this case, the towel warmer to be priced is not a simple towel warmer (I) as in the previous cases, but instead we are now pricing a mixed towel warmer (M1) or thermostatic mixed towel warmer (MT1 / ML1). These already include the heating element , and as a result we do not have to search for the corresponding model and include it in the price, as with mixed single tube towel warmers.

The mixed towel warmer for single tube installation includes: simple towel warmer, purge valve, wall mountings, simple heating element (E1) or thermostatic heating element (ET1 / EL1).

In the case of dual tube towel warmers, it is important to bear in mind that as they have a valve and lockshield valve on the same side, the "I" distance of the towel warmer (between the centre of each tube) is important during installation, as although all of the models are standard, we must measure the distance between the tubes in the wall in order to decide which towel warmer to install.

Obviously, we will have to take the distances H and L into account when installing the towel warmer in the bathroom, although in the case of dual tube installations the distance "I" will have to be considered, as if this is smaller, modifications will have to be made to the tube installation, as it will impossible to do this with the towel warmer.

The distance "I" will be increased or reduced by 69mm if we install a Noken T-connector in a mixed installation. This is because we will move the valve or lockshield valve in this position to the left or right, in order to be able to fit the electric heating element in its place.

## 5.- Radiador eléctrico. Ya incluye todos los componentes para su puesta en marcha.

Dans ce cas, le sèche serviette n'est plus un sèche serviette simple (I), comme c'était le cas dans toutes les hypothèses précédentes, mais bien un sèche serviette mixte (M1) ou mixte à thermostat (MT1 / ML1). Ces derniers sont fournis avec la résistance, ce qui évite de devoir rechercher la résistance correspondante et d'établir son devis, comme dans le cas des sèche serviettes monotubes mixtes.

Le sèche serviette mixte pour installation bitube est fourni avec les éléments suivants : sèche serviette simple, detent, fixations au mur, résistance simple (E1) ou résistance avec thermostat (ET1 / EL1).

Dans le cas des sèche serviettes bitubes, il est nécessaire de tenir compte du fait que, puisqu'il y a une vanne et un détendeur de chaque côté du sèche serviette, la distance « I » du sèche serviette (la distance de centre à centre de tuyau) est importante pour procéder à l'installation car, même si tous les modèles sont standard, il est nécessaire de mesurer la distance existante entre les tuyaux sur le mur afin de pouvoir déterminer quel sèche serviette doit être mis en place.

Il est évident que les distances H et L doivent être prises en compte pour situer le sèche serviette dans la salle de bains, mais c'est pour les installations bitubes que la distance I doit être prise en considération car, si elle est inférieure, il est alors nécessaire de réaliser des modifications sur l'installation du tuyau, du fait de l'impossibilité de réaliser celles-ci sur le sèche serviette.

Cette distance "I" doit être augmentée ou réduite de 69 mm si un raccord "T" de Noken est mis en place pour réaliser une installation mixte. Cette mesure se doit au fait que la vanne ou le détendeur destiné à ce creux se déplacent vers la droite ou vers la gauche, pour pouvoir disposer la résistance électrique à son emplacement.

## - How do I calculate the necessary power depending on the geographic area?

Normally, the towel warmers are used as a towel dryer, in which case we should not be too concerned about its size. A small or medium-sized towel warmer will do this job perfectly well. If we want to completely replace the towel warmer in the house and use the towel dryer as central heating, we will have to use the following formula:

$$\text{Power required} = \text{Cubic metres}^1 \times \text{Zone coefficient}^2$$

$$\text{Puissance nécessaire} = \text{mètres cubes}^1 \times \text{coefficient de climat}^2$$

- <sup>1</sup> Cubic meters = Bathroom surface x bathroom height = Side x side x height
- <sup>1</sup> Mètres cubes = surface de la salle de bains x hauteur de la salle de bains = côté x côté x hauteur
- <sup>2</sup> Zone coefficient:
- <sup>2</sup> Coefficient de climat:

## - Comment calculer la puissance nécessaire en fonction du climat de la région?

Les sèche serviettes sont normalement utilisés comme sèche-serviettes. Dans ce cas, la taille du sèche serviette importe peu. Un sèche serviette de petites ou moyennes dimensions remplit parfaitement cette mission. S'il est souhaité de remplacer complètement le sèche serviette existant à la maison et d'utiliser le sèche-serviettes comme chauffage central, il convient d'appliquer la formule suivante:

zone / climat	Kcal/h	watt	BTU
hot / chaud	40	50	160
warm / tempéré	50	60	200
cold / froid	60	70	240
freezing / très froid	70	80	280

Each country uses a different type of measurement for power. In Spain it is Kcal/hour, in the UK BTU, etc.

- Hot zone: Southern Spain, Canary Islands, Middle East, etc.
- Warm zone: Eastern Spain, Mediterranean Europe, temperate maritime zones, etc.
- Cold zone: Central and north-western Spain, central Europe, France, UK, etc.
- Freezing zone: Eastern Europe, former USSR, Scandinavia, etc.

Chaque pays emploie une unité de mesure de la puissance. L'unité Kcal/heure est utilisée en Espagne, tandis que c'est l'unité BTU qui est utilisée au Royaume Uni...

- Climat chaud : Sud de l'Espagne, Canaries, Proche Orient.....
- Climat tempéré : Est de l'Espagne, Europe méditerranéenne, zones maritimes tempérées...
- Climat froid : centre et Nord-Est de l'Espagne, centre de l'Europe, France, Royaume Uni ...
- Climat très froid : Est de l'Europe, ex URSS, Scandinavie...

As an example, we will use a bathroom in the city of Valladolid (Spain), measuring 2 x 2.5 metres. If we know that it is 2.35 metres high, the calculation would be:

$$\text{Kcal/ required} = (2 \times 2.35 \times 2.5) \times 60 \text{ (zone coefficient)} = 705 \text{ Kcal/hour}$$

Prenons comme exemple une salle de bains à Valladolid (Espagne) de 2 x 2,5 mètres. Sachant que la hauteur de cette dernière est de 2,35 mètres, le résultat serait :

$$\text{KCal / nécessaires} = (2 \times 2,35 \times 2,5) \times 60 \text{ (coefficient de climat)} = 705 \text{ kcal / heure.}$$

In the table of properties for each towel warmer in the price list, the following information is shown:

Le tableau de caractéristiques reproduit sur le tarif pour chaque sèche serviette fait état de l'information suivante:

L mm	600
I mm	573
H mm	1133
Tube nº	28
Kcal/h	798
Watt	932
Resist. w	750
Fij. Nº	4

1 watt = 0,86 Kcal/h
1 Kcal/h = 1,16 watt

These are the maximum Kcal/hour a radiator with these properties would generate  
Il s'agit du nombre maximum de kcal/heure qu'un sèche serviette possédant ces caractéristiques produit

Before choosing your towel warmer, check the technical information to make sure that the heating output fits your requirements. Our products are designed to keep the towels dry and are not always suitable as a primary heating source for your bathroom.

Avant de choisir votre sèche serviette, veuillez bien vérifier les caractéristiques techniques afin d'être certain que la puissance de chauffe corresponde à vos nécessités. Nos produits sont pensés pour sécher des serviettes et ne sont pas toujours dotés d'une puissance suffisante pour servir de source principal de chaleur pour la salle de bain.

The electric towel warmers do not have an even distribution of heat, the upper part will always be hotter than the lower part.

Les sèches serviettes en version électrique n'offre pas de répartition uniforme de la chaleur. La zone la plus haute sera plus chaude que la zone basse du sèche serviette.

The content of this catalogue is protected by copyright and the Intellectual Property Law, Royal Legislative Decree 1/1996. Any reproduction thereof, in whole or in part, without the express authorisation of the Noken may be punishable under current legislation, including the Penal Code.

Noken reserves the right to modify or withdraw products from the catalogue without prior notice, as well as to modify their prices and/or characteristics without prior notice.

The room schemes shown in this catalogue are decorative suggestions for advertising purposes only and should not be used as a guide for the installation of the products. For the installation of the products and to consult their technical characteristics, please refer to the technical data sheets found in the PTC published by Noken. Noken is not responsible for assembly and/or installation errors or defects; it is recommended that the installation is carried out by a professional.

Possible changes in shade or colour must be considered an intrinsic part of the production process of certain products, such as ceramic bathroom fixtures, whether in glossy white or matt colours (white, black, grey...). It is important to be aware that variations in shade, saturation and gloss may occur, depending on the material on which the colouring pigment is applied (ceramic, urea formaldehyde) and the production batch, including possible variations between parts of the same item, such as the ceramic fixture, the seat, the lid or both.

In addition to the variables of the production process, the perception of the colour shade is also influenced by the conditions of the light source, viewing angle and the psychophysical characteristics of the observer or the medium used for viewing.

Le contenu de ce catalogue est protégé par des droits d'auteur et par la loi sur la propriété intellectuelle, le décret royal législatif 1/1996. Toute reproduction partielle ou totale de celui-ci, sans l'autorisation expresse de Noken pourra être sanctionnée conformément à la réglementation en vigueur, notamment le code pénal espagnol.

Noken se réserve le droit de modifier ou de retirer les produits du catalogue sans préavis, ainsi que de modifier leurs prix et/ou leurs caractéristiques sans préavis.

Les ambiances présentées dans ce catalogue sont des suggestions de décoration à caractère publicitaire et ne doivent pas être utilisées comme guide pour les installations des produits. Pour installer les produits et connaître leurs caractéristiques techniques, vous devez consulter les fiches techniques qui se trouvent dans le PTC édité par Noken. Noken ne peut pas être tenu responsable des défaillances ou des défauts de montage et/ou d'installation ; il est recommandé que l'installation soit réalisée par un professionnel.

Les modifications éventuelles de ton ou de couleur doivent être considérées comme faisant partie intégrale du processus de production de certains produits, tels que la céramique sanitaire, soit en couleur blanche brillante, soit en couleur mate (blanc, noir, gris...). Il est important de savoir que des variations de tonalité, de saturation et d'éclat peuvent se produire selon le matériau sur lequel le pigment est appliqué (céramique, urée-formaldéhyde) et son lot de production. Par conséquent, des variations possibles peuvent par exemple exister d'une pièce à l'autre pour un même élément, tel que la céramique sanitaire, le siège, le couvercle ou les deux.

Outre les variables du processus de production, la source d'éclairage, l'angle de vue et les caractéristiques psychophysiques de l'observateur ou du moyen utilisé pour la visualisation influent également sur la perception de la tonalité choisie.
